Coronation Graduate Internships 2026/2027 For Data Analyst Trainee

Description

The Coronation Catapult Programme 2024/2025 is a strategic initiative in partnership with Prescient Securities and Navigare, designed to recruit and develop young graduates for placement within these stockbroking firms. The role of the Data Analyst Trainee focuses on applying statistical and analytical methods to extract, analyze, and interpret data to optimize business processes and enhance decision-making. The trainee will generate comprehensive reports, support automation initiatives, and contribute to continuous improvement efforts within the organization. This opportunity offers multi-asset exposure in a collaborative, dynamic stockbroking environment based in Johannesburg.

As a Data Analyst Trainee in the Coronation Catapult Programme, participants will gain hands-on experience in data mining, extraction, and reconciliation from various sources. The role involves analyzing and collating large datasets to uncover trends and solutions, validating data integrity, and generating insightful reports for stakeholders. The program emphasizes continuous learning in areas such as data analysis, machine learning, and financial markets, providing a solid foundation for future growth within the organization. Trainees will work closely with Business, IT, Quantitative, and Development teams, enhancing their knowledge across multiple asset classes while contributing to key organizational initiatives.

Responsibilities

- Develop and apply database design principles and SQL skills for querying and managing databases.
- Perform data mining, extraction, and reconciliation from multiple data sources.
- Analyze and process large datasets to identify patterns and provide actionable insights.
- Ensure data integrity and accuracy for analysis purposes.
- Assist in updating and maintaining the internal technology catalog and process register.
- Support business analysis efforts and document processes as instructed.
- Generate data-driven reports and presentations for various stakeholders, including the Executive Committee.
- Stay informed about developments in data analysis, machine learning, and financial markets to drive innovation.
- Collaborate with cross-functional teams to optimize data analysis and business requirements.
- Handle ad-hoc requests as needed to support the business.

Qualifications

- A relevant tertiary qualification (BCom, BSc, BBusSci, Hons) in a quantitative finance-related field such as Investments, Analytics, Quantitative Finance, Statistics, or Mathematics.
- Advanced Excel skills.

- Career growth opportunities through structured learning and development programs.

How to Apply?

Interested candidates should submit their CV along with their full academic record. The Coronation Catapult Programme values diversity and seeks candidates with strong communication skills, a structured work style, attention to detail, and a client-service orientation. This is a graduate role, so no prior experience is required, but candidates should demonstrate resilience, curiosity, and a proactive approach to problem-solving.

Applicants are encouraged to apply through the official application portal, ensuring that all necessary documents are included for consideration.
